PRINCIPLES OF CHIROPRACTIC

with Simon A. Senzon, M.A., D.C.

SATURDAY - MAY 12th 2007

Hours - 10 am to 8 pm (registration at 9:30 am).

This is an accelerated 12 hr CE credit course given in 10 clock hours

Simon A. Senzon, M.A., D.C., has been writing about the history and philosophy of chiropractic for the last ten years and in that short time has mapped out a new way to understand the philosophy that chiropractic rests upon. The first research fellow in philosophy at Sherman College, Simon has published six peer-reviewed articles and two books with two more books in development. Through extensive research, Dr. Senzon has been able to show that the basic tenets of chiropractic can be understood by using the latest advances in biological theory, philosophical thought, as well as models of spiritual and psychological health and development. Dr. Senzon maintains a private practice in Asheville, North Carolina where he also teaches at the University of North Carolina and as an extension faculty member at Sherman College. He is currently the Director of the Subtle Energies Center and the Co-director of the Consciousness Studies Center at Integral University. He has developed an online resource for the profession dedicated to the history and philosophy of chiropractic at www.philosophyofchiropractic.com

The Principles of Chiropractic explores the fundamental roots of chiropractic, the varied perspectives historically, and the major influences, controversies, and misunderstandings of chiropractic's development through an integral perspective. In this program you will learn and explore:

- The **ORIGINAL roots of chiropractic** – and they are not what you think!
- **Never before discussed historical perspectives** on the Principles of Chiropractic
- The influence of western thought on the Principles of Chiropractic and how **chiropractic is at the forefront of modern thought.**
- A new context for the Chiropractic Principles which **easily integrates** into practice.
- The **most pivotal and controversial moments in the evolution of chiropractic** over the past 107 years and why those moments still influence your practice today.
- Concepts of organization which demonstrate the living and dynamic nature of the Chiropractic Principles.
- **Critical perspectives** on the Chiropractic Principles you **must know** to ethically practice chiropractic today.
- Models of Dynamical Physiology that **you can use everyday in practice.**
- **Complexity and the New Science made easy!**
- Why Integral is THE FUTURE of chiropractic and **why you can't afford to miss this boat!**
- **Integral Life Practices** for chiropractors & patients to improve outcomes and satisfaction with care.
